Ph.D. in Computer Science from PUCRS. I research imitation learning, reinforcement learning, foundation models for tabular data and generative AI. I work in industry as a researcher and data scientist.

Education

MBA in Leadership, Team Management and Productivity — PUCRS, Pontifical Catholic University of Rio Grande do Sul (Jul 2026 – present)

Ph.D. in Computer Science — PUCRS, Pontifical Catholic University of Rio Grande do Sul (2018 – 2023)
Advances in Imitation Learning from Observation

M.Sc. in Computer Science — PUCRS, Pontifical Catholic University of Rio Grande do Sul (2016 – 2018)
Evaluating the feasibility of deep learning for action recognition in small datasets **2nd best Master's dissertation in Artificial Intelligence in Brazil (CTDIAC-BRACIS 2018)**

Associate Degree in Systems Analysis and Development — IFRS, Federal Institute of Education, Science and Technology of Rio Grande do Sul (2011 – 2014)
Analysis of the Applicability of Artificial Intelligence Techniques in a Digital Game: An Approach with Intelligent Agents

Industry experience

AI Researcher — Kunumi Institute (2025 – present)
AI Researcher and Data Scientist — Dell Technologies (Jul 2023 – present)
Data Scientist — Sicredi (May 2022 – Sep 2023)
ML Engineer — unico IdTech (Nov 2021 – Apr 2022)
Intern – Software Developer — CWI Software (Apr 2015 – Sep 2015)
Intern – Performance Tester — Dell Technologies (Dec 2013 – Feb 2015)
Intern – Service Reports — Stefanini IT Solutions (Mar 2013 – Jul 2013)

Teaching

Instructor – Machine and Deep Learning 1 — Feevale (2021)
Instructor – Data Science — TargetTrust Courses (2020 – 2021)
Instructor – Python for Data Science — Feevale (2018)
Teaching Assistant – Business Intelligence — PUCRS (2018)
Teaching Assistant – Database Laboratory — PUCRS (2018)

Awards

2nd best Master's dissertation in Artificial Intelligence in Brazil — PhD Thesis Contest in Artificial Intelligence, CTDIAC-BRACIS, 2018

Best Paper — IEEE IJCNN, 2017

Best Student Poster — IFRS, Canoas Campus, 2015

Skills

Machine learning: Imitation Learning, Reinforcement Learning, Deep Learning, Generative AI

Foundation models and LLMs: Tabular Foundation Models (TabPFN), Language Models, Uncertainty Estimation

Tools: Python, PyTorch, OpenAI Gym, Git

Data and healthcare: Data Science, Synthetic EHR data, Clinical concept normalization
